ASSIGNMENT #02

Q.

I am connected to the internet by an Internet Service Provider (ISP) i.e. PTCL, which is a Wide Area Network (WAN).

This connection uses a fibre optic cable that uses light signals for high speed data transmission. Telephone lines are also used for internet connectivity.

- CAPACITY:

My internet connection has,

⇒ Downloading speed: 50-60 Mbps

⇒ Uploading speed: 50-60 Mbps.

- TECHNOLOGY USED:

- Wi-Fi
- IP-protocols
- Router

- BASIC WORKING PRINCIPLES:

- i) I make a request.
- ii) My request is transformed to packets that contain the destination IP addresses.
- iii) The packets are sent to the router which forwards them to ISP.
- iv) The ISP routes them across the WAN and our request is completed on finding our requested site/server/destination.

Q₂

I downloaded Subway Surfers on my iPhone over my 5G PTCL internet. The game was 362.2Mb and it took, 1 minute 35 seconds to download.
