1. Intro & What Is a Digital Footprint

Meaning

Information we leave online

Key idea

Internet remembers actions

2. Types of Digital Footprints

Active Digital Footprint

- Intentional online actions
- User is aware of sharing
- Examples: Posts, likes, forms, emails
- Risk: Hard to delete, reputation impact

Passive Digital Footprint

- Data collected automatically
- User often unaware
- Examples: Cookies, tracking, location
- Risk: Privacy and security concerns

3. How a Digital Footprint Is Created

Social media activity -
Permanent records

Browsing websites -
Cookies & history

Account sign-ups -
Personal data stored

Online searches -
Search history saved

Online shopping - Payment &
purchase data

Emails & messages - Digital
storage

Location services - GPS tracking

A photograph of several young students sitting at desks in a computer lab, looking at their laptops. The scene is dimly lit with blue light from the screens and overhead lights.

4. Why Digital Footprints Matter to Students

University
admissions checks

Future job
screenings

Government &
official job
sensitivity

Opinions shared online -
long-term impact

Nature of digital data -
permanent & searchable

5. Managing Digital Footprint Risks

6. Conclusion & Feedback

1

Every online action leaves a trace

2

Awareness leads to safer usage

3

Audience reflection questions

4

Final takeaway: Control your digital identity
